

## This Year, Resolve to Enjoy Straighter Teeth in El Reno

meta description: Are you dealing with the damaging effects of misaligned teeth? Learn about your straightening options in El Reno.

Crooked, crowded, gapped or otherwise misaligned teeth -- we know they don't do anything for a person's confidence. Fortunately, we here at [El Reno Family Dentistry](#) are passionate about building healthy, beautiful smiles here in our community. So this year, why not resolve to finally do something about your misaligned teeth? We offer a variety of wonderful treatment options to help you achieve the beautiful smile you deserve. Keep reading to learn more from the cosmetic dentist your El Reno neighbors trust, Dr. Adam Cohlmiya!

### 2016: The Year You Get the Straight Teeth You Deserve

Misaligned teeth do more than harm your self-confidence. Even minor misalignments can also cause issues like TMJ disorder, a painful condition that affects your ability to properly open and close your jaw. Crooked, crowded, gapped and teeth with malocclusions can be straightened with one of the following options.

#### Invisalign Perfects El Reno Smiles

Many adults and image-conscious teens avoid orthodontic treatment because they believe traditional metal braces are their only option. Fortunately, there's Invisalign, an FDA-approved system that uses clear plastic aligners to gradually shift teeth into their preferred position. The benefits of this option are many when compared to conventional braces, and some include:

- Comfort: Never worry about the irritation of a loose bracket or wire with Invisalign.
- Convenience: Use the trays as directed and you can work through the treatment without visiting the dentist's office for constant readjustments.
- Privacy: With clear plastic aligners, chances are excellent no one will ever know you're undergoing orthodontic treatment.

#### Porcelain Veneers Instantly Enhance Teeth

When slight imperfections get in the way of your smile, porcelain veneers may be the solution you need. Ultra-thin coverings made of porcelain, veneers are bonded securely onto your front teeth to restore their overall appearance. Our El Reno practice is proud to offer [LUMINEERS](#), too.

Porcelain veneers and Lumineers correct a number of dental issues, including the following:

- Cracked or chipped teeth
- Slightly gapped or misaligned teeth
- Teeth that appear too short
- Stained or discolored teeth that haven't responded to teeth whitening

## White Crowns in El Reno Restore Form and Function

When your teeth are suffering from a number of issues (like front teeth that are gapped, stained *and* chipped) Dr. Cohlma may recommend a beautiful white crown. This option is usually completed in two visits to El Reno Family Dentistry and provides the beauty and function you want.

## Bridges Replace One or More Missing Teeth

When your smile is missing one or more of its teeth, a dental bridge help to regain the stability you need. This option fills the gap left by the missing tooth (or teeth) using the two surrounding natural teeth as anchors, which secure the prosthetic teeth in between.

## ... And Don't Forget Teeth Whitening!

Once your beautiful tooth restoration has been completed in El Reno, don't think the improvements stop there! We can also discuss your options in [teeth whitening](#) to put the finishing touch on your dazzling smile.
