Celebrate National Children's Dental Month at El Reno Grand Dental Studio

Though February is National Children's Dental Month, many people may not think their child's smile is anything to worry about. A child's smile is just as important, if not more, than an adult's, as their teeth are more at risk of being infected. [Dr. Michael Kirk](#) and [Dr. Adam Cohlmia](#) understand the importance of your child's smile, which is why they offer **children's dentistry!**

It is important to establish healthy dental habits in your child at an early age. When your little one becomes aware of the proper ways to take care of their teeth early on, they are able to carry those healthy routines with them throughout their life. An important aspect in **children's dentistry** is **dental sealants**. The molars and premolars have deep grooves and pits, giving bacteria an ideal breeding environment. The **dental sealants** offer your child's smile protection by covering those grooves, preventing harmful bacterium from making your child's smile their home. **Dental sealants** are a key component in cavity prevention, as the molars and premolars are the primary chewing teeth.

Another important area in **children's dentistry** is **fluoride treatments**. **Fluoride** is an interesting mineral, as they attract other minerals to help your child's teeth become strong. Tap water is a good way for your child to get **fluoride**, but because many people use bottled water, your child could be missing out. When your child comes in for their appointment, our team will be able to determine whether or not their smile needs a **fluoride** boost. Both **dental sealants** and **fluoride treatments** are wonderful and effective ways to keep your child's smile as healthy and beautiful as possible!

Take advantage of National Children's Dental Month, and make your child's appointment today! We will be able to set them up for success, and they will be able to have a wonderful smile!

If you'd like to set up an appointment, [call us](#) today at **El Reno Family Dentistry**. Our office is located in **El Reno** and serves patients from **El Reno, Yukon, Minco, Calumet, Hinton**, and other communities in the **Canadian County**.
