Dental Implants for a Complete Smile

Are you missing teeth and not sure what to do about it? At [Grand Dental El Reno](#), we're here to help and offer [dental implants](#) to help replace your missing teeth and restore your smile. We believe that everyone deserves to have a healthy, beautiful smile.

It is important to replace your missing teeth to reduce your risk of jawbone shrinkage and the risk that you'll lose other teeth. **Dental implants** are a great choice if you're missing just a few teeth. Loss of jawbone structure can affect your appearance and make you look older than you really are.

A **dental implant** consists of a titanium post inserted into your jawbone and the crown that will go on top to replace the missing tooth. The post will bond with your jawbone to create a solid, secure foundation for your **implant** that mimics the roof of a natural tooth.

Dr. Michael Kirk studied **dental implants** extensively at the postgraduate level at the University of Texas and wants to put his expertise to good use and help improve your smile. Since **Dr. Kirk** specializes in **dental implants**, we can place the **implants** and restore your smile all in our office, so you won't need to visit anyone else. We work hard to try and offer dental treatments that fit into the busy lives of our patients.

Dental implants are the most permanent method to restore missing teeth and give you a beautiful smile once again. If you're missing teeth, give us a call and get started on the path towards a full, beautiful smile.

Interested in learning more about **dental implants** or scheduling your next appointment? [Call](#) us today at **Grand Dental El Reno**! Our office is located in **El Reno** and serves patients from **Minco, Calumet, Hinton, and other communities in the Canadian County.**
