

All About Invisalign (Plus Our Special Offer!)

Can't bear the thought of bulky metal braces? Learn about how you can straighten invisibly with Invisalign in El Reno!

Are you suffering from low smile-confidence? Maybe you know what we're talking about: reluctance to show your teeth, or feeling like you should pose for photos with your lips closed. If that sounds like you -- or if you'd just like to improve a misaligned bite -- you don't have to endure the hassle and potential embarrassment of bulky metal braces. Invisalign is a discreet option for adults and older teens that you can find from your dentist in [El Reno](#)! And to make it even easier for you to receive the orthodontic treatment you need, we're currently offering \$500 off Invisalign treatment. Keep reading to learn more today!

Invisalign Reveals Your Most Beautiful Smile

The FDA-approved Invisalign system uses a series of custom plastic aligners to gradually shift your teeth into their preferred position. It's a faster, more convenient and discreet way to achieve proper alignment.

To set you up with your Invisalign system, Dr. Cohlmiya will take careful impressions of your teeth and determine the best method for treatment. Our office will compile this important information and send it to the Invisalign lab, where your series of aligners will be created. Once they're ready, you'll receive them in the mail -- and you can begin your treatment immediately! You'll advance through the system by switching to a new aligner every two weeks, each time one big step closer to your new, beautiful smile. The average Invisalign treatment time is 12 months.

Benefits of Invisalign Clear Braces

You can experience the wonderful benefits provided by Invisalign. Some of them include the following -- which one will you appreciate most?

Increased comfort. With the smooth plastic trays of Invisalign, you won't ever experience the discomfort of a popped off wire or loose bracket.

Easier to use. Because Invisalign's trays are removable, you don't have to learn any special brushing or flossing techniques -- and you can also continue to eat a healthy diet with all your favorite crunchy foods. Just discreetly slip out the aligners before eating and cleaning.

Faster treatment time. When compared to traditional metal braces, the Invisalign treatment is far faster -- by about six months to a year, on average.
